DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Acknowledgments

2. Acknowledgment is made of the IDS filed 2/20/01.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a) because they fail to show feed line "14" as being connected to the gas generator "9" as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3618

5. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
6. Claim 4 recites the limitation "coolant" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

~~The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).~~

8. Claims 1-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Wheeler (6,277,509 B1).

Wheeler discloses a water recovery system 10 comprising a fuel cell 12 for powering a motor or battery 42, a cooling circuit (or loop) 44, heat exchangers

52,58,74, cathode and anode exhaust streams 38, gas (or steam) generator 60, a coolant pump 50, and a plurality of condensate traps (or hydride beds) 90,92,94,96, wherein said heat exchanger condenses the exhaust gas of the fuel cell for recirculating into the cooling circuit of the fuel cell based on temperature readings of the vehicle, as shown in figures 1-3B.

With respect to claims 7 and 8, Wheeler discloses the method of operation of the water recovery system in claims 15-19.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bonville, Jr. et al., Murphy et al., Murach et al., Sederquist, Reiser et al., Konrad et al., Salvador et al., and Andrews et al. all disclose fuel cell systems of interest.
